

Toilet Cleaner Portfolio

PVA Hygiene provides an innovative and sustainable method of cleaning. As the UK's leading manufacturer of water-soluble cleaning products, we cover all areas of commercial cleaning. Over 24 years, we have developed a system using pre-dosed sachets that is straightforward to implement and balances environment diligence with commercial demands. Based in the South West of England, we distribute globally.

This portfolio contains documents relating to PVA Hygiene's TOILET CLEANER.

This unique formulation is contained within a PVOH or paper film that dissolves at the point of use. The sachets are dry, compact and light, they reduce storage space, transportation costs and heavily reduce the environmental implications often associated with delivering cleaning supplies. The sachets are packed in planet friendly packaging, that can either be composted or recycled, helping you to eliminate single-use plastic from your current cleaning procedure.

USE INSTRUCTIONS

Part fill a toilet duck with warm water and add one Toilet Cleaner Sachet. Replace the duck cap and ensure the dispense nozzle in the closed position. Vigorously shake the duck until the solution colour changes from clear to blue to green. Carefully remove the cap, there will be a slight hiss as CO₂ produced by the effervescence of the sachet contents is released. Top the duck up with cold water, re-attached the cap and shake for a few seconds to mix. Once mixed the duck should be allow to stand for 20 to 30 minutes to cool to room temperature, during which time viscosity will develop.

For routine cleaning, flush the toilet, open the dispense nozzle on the duck and squirt around the top of the bowl, directing the jet under the rim. Allow the liquid to run down the bowl into the trap water, where the colour will change from green to a fresh blue After approximately 5 mins flush to rinse.

For deep cleaning, flush the toilet, use a toilet brush to pump and lower the level of water from the base of the bowl, and use the brush to loosen any debris. Spray toilet cleaner around the bowl and rim. Allow the liquid to run down the bowl into the water contained in the trap, where the colour will change from

green to a fresh blue, after approximately 5 minutes use a brush to clean around the bowl and in the bottom of the pan, then flush to rinse.

In circumstances where excessive scale has developed use this product in conjunction with the Toilet Descale Booster Sachet.

Note: This product should only be used for cleaning Toilet Bowls, it is not recommended for toilet seats, or for other bathroom surfaces such as Tiles, Tile Grouting or Hand Basins.

Note: This product must never be mixed with or be used in conjunction with Bleach, this will produce Toxic Chlorine gas and breathing difficulties.
