

Recycling waste products designed for new legislation.

You have probably seen the new recycling legislation for businesses in England with a workforce of 10 or more staff.

As of March 2025, businesses will be mandated to separate dry mixed recyclables and food waste from general waste, to be collected separately by an approved contractor. This initiative is a key step in the UK's pursuit of improved recycling rates and meeting net zero commitments.

To clarify, businesses will be required to

segregate waste into categories such as paper, plastic, glass, metal, food, and general waste, potentially leading to the use of seven different waste containers. Non-compliance could result in penalties, so it's important we all do our part, and as manufacturers and distributors, to provide adequate education about these changes.

Similar legislation has been operational in Scotland since 2014 and was introduced in Wales recently, bringing the UK closer to unified waste management practices.

Procycle Recycling Bin 80L

A modular recycling system with a range of back panel designs. Includes connectors to build your own multi-recycling stations. The design features apertures at the front of the bin to attach waste bags (bags not included), while the lid can be lifted for the disposal of larger items and removed for an open bin option.

These hardwearing bins are available with colour coded back panels for glass bottles & jars, food tins & drinks cans, mixed paper and card, food waste, plastic packaging, general waste, and mixed recycling.
